Frederic P. Storke, Don W. Sears : Colorado Security Law before purchasing it in order to gauge whether or not it would be worth my time, and all praised Colorado Security Law:

The basic thesis of this book is that the Security Transaction is a single concept, to be studied in its unity. The reader is given an opportunity to compare the application of the general principles of priority to real and personal property, tangibles and intangibles to see how consistently these principles operate in spite of the multifarious forms which individual transactions may take.
