D Hensler : Compensation for Accidental Injuries: Research Design and Methods before purchasing it in order to gage whether or not it would be worth my time, and all praised Compensation for Accidental Injuries: Research Design and Methods:

To support its research on the design and performance of accidental injury compensation systems, the Institute for Civil Justice undertook a national survey of accident victims that sought to determine who these victims are, how severely they are injured, how much their injuries cost, how the victims seek compensation, who files liability claims and why, and what results victims obtain.
