Mark Furse : Competition Law of the UK and EC before purchasing it in order to gauge whether or not it would be worth my time, and all praised Competition Law of the UK and EC:

This text provides a clear and well-structured approach to competition law as it operates in the UK. This also includes the law of the European Community, which has direct impact in the UK, and on which UK law is now largely based. The text includes full commentary relating to the Competition Act 1998, including the relevant secondary legislation and guidelines. Recent changes at the Community level, including the block exemption on vertical agreements, along with its guidelines, and the proposed changes to the horizontal block exemptions are also dealt with. The text introduces readers to the basic economic principles underpinning the law, the regulatory agencies, theories and practice of enforcement, and the substantive rules relating to agreements, monopolies and mergers. Common law rules are dealt with to the extent that they remain relevant. The book concludes with an examination of the increasing problems of globalization.

‘Fills a gap in the market for a cheap but well written student's book on this important topic.’ *New Law Journal* ‘It is always a mark of a successful textbook when new editions follow in successive years. This is the case with Furse's admirable Competition Law, which has quickly established itself in the market place. ...the special feature of this

book, which adds to its attraction, is the concentration on economic aspects of the subject. ... An added bonus is Mr Furse's informed discussion of the impact of globalisation on competition questions. This will be a growing source of concern as the new Century progresses.'NLJ Book Supplement October 12 2001`It is always the mark of a successful textbok when new editions follow in successive years. This is the case with Furse's admirable Competition Law, which has quickly established itself in the market place.. the special feature of this book, which adds to its attraction, is the concentrationon economic aspects of the subject. An added bonus is Mr Furse's informal discussion of the impact of globalisation on competition questions. This will be a growing source of concern as the new century progresses.'Gavin McFarlane, Dechert and London Guildhall University. NJL Book Supplement.About the AuthorMark Furse is a Senior Lecturer at the University of Westminster and is also involved in the delivery of Masters courses at the London School of Economics, and the University of Lund, Sweden. He has also been involved in the training of OFT staff. He has almost 15 years experience of teachingcompetition law and has published frequently on this subject.
