**Patricia Bellia, Paul Berman, Brett Frischmann, David Post : Cyberlaw: Problems of Policy and Jurisprudence in the Information Age, 4th (American Casebook Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Cyberlaw: Problems of Policy and Jurisprudence in the Information Age, 4th (American Casebook Series):

2 of 2 people found the following review helpful. Not bad and pretty interestingBy looksbooksNot bad and pretty interesting.Unfortunately, a lot of the materials are from the late 90's, early 2000's (though there is plenty of modern

articles as well) in addition to a few court cases that are no longer good/relevant law. 0 of 1 people found the following review helpful. awesome deal By AA Excellent material. Fast shipping. Working as expected. Recommend this.

This edition has been reorganized to clarify the themes of the book and updated to illuminate new debates at the heart of this evolving field. It groups the material into units addressing the who, how, and what of governance/regulation—fundamental questions that pertain to any legal system, in cyberspace or elsewhere. It includes unit-ending case studies on governance of the domain name system, efforts to control the exchange of counterfeit goods in the online marketplace, and the Google Books Settlement, as well as updated treatment of a number of topics, including peer-to-peer file sharing, online behavioral advertising, and more.
