Denny Frasers stories about going to law school at age 50 are genuinely funny, motivational and full of lifes lessons. I read the book in two sittings because I didnt want to stop reading. Denny teaches us how to perceiver and laugh at ourselves. I am amazed at his talent for telling a compelling

story and his memory for details. There is something for everyone in this book. It is well worth your time if you like to laugh your way through a book. It will put a smile on your face and you'll be cheering for the under dog by the end of the book. Congratulations Denny on a great book and another great achievement. 0 of 0 people found the following review helpful. Buy This Book if You Like To Laugh And Enjoy Positive Thinking! By Edward Gelb I was so pleased with this book. It is written as if your close friend is talking to you. It makes you laugh, brings a tear to your eye and fills you with emotion. The author, Denny Fraser, has a great sense of humor and it's off the cuff. I was surprised because I always had the idea that attorneys weren't funny or acted human!! Mr. Fraser changed that for me. This is definitely a must read book. It is light and reads really fast. It is so uplifting and gives such a positive message. My next thought is that he needs to write another one. I am going to wait for it. If you want some entertainment and enjoyment, buy this book. 0 of 0 people found the following review helpful. Wonderful, funny By Phoebe Wonderful, funny, inspiring book written by a very good guy. I've known and been friends with Denny since the sixties. He is the funniest man I've ever known. His humor and great personality show up all through the book. He writes just like he is, inspirational, very funny and determined to fulfill his dream. It tells how his sweet wife and daughters supported him through the whole thing. Once you start reading the book you can't put it down, just a GREAT book. Phoebe Dinkins

Law School at Fifty is more than a witty memoir; it is a thoughtful personal narrative about picking up a dream while ignoring the inescapable question, why did you ever think you could?
