Jairam Ramesh, Muhammad Ali Khan : Legislating for Justice: The Making of the 2013 Land Acquisition Law before purchasing it in order to gage whether or not it would be worth my time, and all praised Legislating for Justice: The Making of the 2013 Land Acquisition Law:

Land ownership in India has always been a risky proposition. The hitherto unfettered power of acquisition and the refusal of the Parliament to recognize the right to own property as a fundamental one, had emboldened the state to stake claim on any land it saw fit. However, in the years 2012-2014, the Government of India embarked on an exercise to not just amend but to rewrite the law on acquisition. This process saw the radical polarization of public opinion into two sharp sides a those who saw acquisition as a necessary tool to India's development (given the absence of other mechanisms guaranteeing clear title), and those who were sharply opposed to an archaic relic that defied the rule of law. This book attempts to explain the rationale employed behind each and every provision by the then Minister and his Principle Aide who helped draft the law. The book is a firsthand account of the challenges faced and the factors that drove the decisions in regulating the States approach to a resource that is arguably the most important in a land deficit people surplus nation.

About the AuthorJairam Ramesh is Chair of the Future Earth Engagement Committee, a research platform on global sustainability. Formerly he was the Minister of Rural Development and Minister of State (Independent Charge) of Environment and Forests, Government of India. He is also a member of the Rajya Sabha, the Upper House of the Parliament of India.Muhammad Ali Khan is an advocate practicing in the Supreme Court of India.
