had read reviews and over and over people had mentioned the heavy emphasis on "case studies". Instead of a real "how-to" book with advice (Probably NOLO The Foreclosure Survival Guide: Keep Your House or Walk Away With Money in Your Pocket would be a better fit for this). After a recent "60 Minutes" story on the entire Mortgage crisis and debacle (regarding mortgage pools and securitization) I went on a bit of a bender looking for loopholes and trying to understand and ensure that I have a clear note and title when it comes to selling my house. I am not in mortgage trouble or under water, but I was curious about the robo-signing and predatory lending practices going on in the industry and I decided to get this book. A few minutes with it and I decided to return it. I saw no value in it for me or my situation. The person who MAY gain value from it is someone trying to save their home and who has proof that their home is in the MERS system, is securitized and perhaps lost in the fray. In other words, their title has clouds on it and will never be a clear one. YIKES. The book gives court cases / case studies in one volume. The first 30+ pages are the author, the rest is all dry legal stuff. Not particularly true to its title. However, it does put research in one easy volume if that is what you need for burden of proof. Good luck with this one. 1 of 1 people found the following review helpful. OK as a supplement to other books on this subject ... By Joseph Lau OK as a supplement to other books on this subject. Doesn't really offer much in the way of strategy and tactics. Doesn't make clear who the players are you're dealing with and the evidence you need to prove your case. 9 of 10 people found the following review helpful. political diatribe + mortgage foreclosure cases By Qwester The author's only contribution is the anti-Bush diatribe at the beginning. The Mortgage War parts are cases that can be downloaded from the Web for very little cost. Almost no critique of these cases. Very disappointing although the author's connection with the Bill Clinton administration might have been a warning.

A quiet title action can help you save your home! Judges across America are dismissing foreclosures because the lenders who have sold mortgages have no legal standing to foreclose. If you have an adjustable-rate mortgage, you can fight mortgage fraud and foreclosure with a quiet title action and win. When victimized homeowners, reeling from payment shock, were forced into foreclosure, many refused to leave. They took to the courts and have won damages and had their mortgages extinguished due to predatory lending practices. You can be one of them. Fight back by using the step-by-step plan here:
