From T.M.C. Asser Press : Netherlands Yearbook of International Law 2011: Agora: The Case of Iraq: International Law and Politics before purchasing it in order to gauge whether or not it would be worth my time, and

The Netherlands Yearbook of International Law was first published in 1970. It has two main aims. It offers a forum for the publication of scholarly articles of a more general nature in the area of public international law including the law of the European Union. In addition, it aims to respond to the demand for information on state practice in the field of international law. Each Yearbook therefore includes documentation on Netherlands' International Law practice.

From the Back Cover The Netherlands Yearbook of International Law (NYIL) was first published in 1970. It offers a forum for the publication of scholarly articles of a more general nature in the area of public international law including the law of the European Union. The main scholarly articles of this volume of the NYIL deal with the life and legacy of T.M.C. Asser and the legal aspects of the transfer of authority in UN Peace Operations. The Agora in this volume raises the fundamental question: what does the 2003 Iraq intervention teach us about the relation between international law and politics? The contributions to this section address this question from different angles, including the perspective of international relations, international legal theory, positive international law, discourse analysis, as well as the views of an international legal advisor. The contributions depict a rich and complex image of the relationship between international law and politics: beyond the relative indeterminacy of the law and beyond the collapsed boundary between international law and politics, it appears as if an international rule of law re-emerges as a specific way of doing politics.
