You deal with Article 9 of the UCC which reads similar to the TAX CODE and deals with commercial law that will frustrate and bore you to death. This book is one of the few Ive seen that you can't get a corresponding supplement for to help with the tons of ridiculously hard problems so I don't recommend it but you will probably be stuck with it if your professor chooses to require this text. This book was great for my UCC Article 9 law course. Only thing I do not like about it is that the book does not have an answer section to the problems. For almost all of the problems it points the user to the correct section of the UCC for guidance but it does NOT supply the answer. Without a professor to clear up issues, the user may run into some problems.

The book is pretty slim, so it's not too heavy to carry. I learned a lot through this book, since I did not know anything about UCC9 before. The Octopus Bank constantly being the lender in the hypothetical throughout the book does get a bit annoying though towards the end.

Problems and Materials on Secured Transactions, continues to be the best choice for courses in secured transactions law. In a problems-based format, this brief, clear text presents a practical, straightforward approach to the topic, making it popular among students and instructors alike. This edition retains the great features that earned it widespread recognition in its previous editions: thorough and up-to-date coverage on black letter law flexible content and organization, making it adaptable to many teaching styles a popular problems-approach which tackles the material in a straightforward and practical manner the distinguished author Douglas J. Whaley, who draws on his experience in teaching, writing, and practice a clear and lucid writing style and a manageable length, offering a concise, efficient, and effective format inclusion of the most important cases, which illustrate the reactions of the courts to the issues
